

ODT Summative 2

Idea Brief:

Our project is based on the character Rocky from Project Hail Mary. We plan to make a robotic version of him with mechanical limbs that can help him move forward and backwards and make hand gestures such as a thumb-down and a fist bump.

We plan to use 6-7 servo motors for the main limbs (5), and the specific hand gestures as well. We are also planning to make the body out of cardboard, and newspaper to keep it lightweight and flexible.

Basic Idea Sketch:
